

Mini ERP + CRM Operations Portal

Step-by-Step Screen Recording Guide with Exact Click Sequences & Voiceover Scripts

Target Length: 5 - 6.5 Minutes Platform URL: <http://localhost:5173> Stack: React 19 · Node.js · Express · TypeScript · Prisma · PostgreSQL

How to Read This Guide: Each step is broken into numbered sub-actions (1.1, 1.2, 1.3...). Follow them in exact sequence. Color-coded tags tell you what kind of action it is: **CLICK** = mouse click, **TYPE** = keyboard input, **OBSERVE** = point your cursor at something, **NAV** = switch tab/page, **WAIT** = pause briefly, **SAY** = speak this to camera.

Pre-Recording Checklist

Do This Before Pressing Record

- ☐ **Screen:** 1080p (1920x1080), browser at 100% zoom
- ☐ **Browser:** Close bookmarks bar and all other tabs
- ☐ **Start At:** Open <http://localhost:5173/> and make sure you're logged out
- ☐ **Server:** Run `npm run dev` in the project root folder
- ☐ **Audio:** Test microphone - clear voice, no echo
- ☐ **Recorder:** OBS Studio or Windows (Win+Shift+R) at 1080p 60fps

Demo Accounts Reference

Pre-Seeded Credentials

ROLE	EMAIL	PASSWORD	WHAT THIS ROLE CAN DO
ADMIN	admin@operations.com	Admin@123	Everything: Products, Challans, CRM, User Management
SALES	sales@operations.com	Sales@123	CRM Customers + Draft Challans. <i>No stock adjustment, no Users tab</i>
WAREHOUSE	warehouse@operations.com	Warehouse@123	Stock IN/OUT + Confirm/Cancel Challans. <i>No CRM, no Users tab</i>
ACCOUNTS	accounts@operations.com	Accounts@123	Read-only auditor across all modules

Recording Timeline Overview

Total: ~6 Minutes

TIME	SECTION	WHAT YOU WILL DEMONSTRATE
00:00 - 00:35	Step 1: Login	Introduce project, use 1-click Admin login, enter dashboard
00:35 - 01:45	Step 2: Products	Browse catalog, low-stock filter, add product, stock adjustment, audit log
01:45 - 03:00	Step 3: Challans	Create draft challan, add items with price snapshot, confirm dispatch
03:00 - 04:00	Step 4: Customers	Add customer, schedule follow-up, show overdue alerts
04:00 - 05:00	Step 5: Users	KPI cards, add user, edit role, delete user
05:00 - 05:50	Step 6: RBAC Proof	Logout, login as Warehouse & Sales, show restricted access
05:50 - 06:10	Step 7: Wrap-up	Summarize architecture, thank evaluators

1 Project Introduction & Login

00:00 - 00:35

- 1.1 **SAY** "Hello everyone! Today I'm showcasing my Mini ERP and CRM Operations Portal, built for wholesale and distribution enterprises. The tech stack uses Node.js, Express, TypeScript, Prisma ORM with PostgreSQL on Neon Cloud, and React 19 with Vite."
- 1.2 **OBSERVE** You should be on the **Login screen**. Move your cursor slowly over the page title "Operations Portal - Mini ERP & CRM" to highlight the clean, professional design.
- 1.3 **OBSERVE** Point your cursor at the **Quick Demo Login** buttons at the bottom of the form (Admin, Sales, Warehouse, Accounts).
- 1.4 **SAY** "The login page features 1-click role demo buttons that prefill credentials instantly. I'll click Admin to sign in with full superuser access."
- 1.5 **CLICK** the blue **Admin** quick-login button. The email and password fields auto-fill.
- 1.6 **WAIT** 1 second so the viewer can see the prefilled credentials.
- 1.7 **CLICK** the **Sign In to Portal** button. The dashboard loads.

2 Products Catalog, Stock Adjustment & Audit Log

00:35 - 01:45

- 2.1 **NAV** Click the **Products** tab in the top navigation bar.
- 2.2 **SAY** "Here's the Products module where warehouse operators can view real-time stock levels across the entire catalog."
- 2.3 **OBSERVE** Slowly move your cursor across the table headers: **SKU, Name, Category, Price, Stock, Reorder Level**. Point at any red **Low Stock** badge.
- 2.4 **SAY** "Notice the red Low Stock badges. These automatically appear when a product's current stock falls below its reorder threshold."
- 2.5 **CLICK** the **Show Low Stock Only** checkbox to filter. Pause 2 seconds. Then **CLICK** it again to uncheck.
- 2.6 **CLICK** the **+ Add Product** button. A modal opens.
- 2.7 **WAIT** 1 second for the viewer to see the form layout.
- 2.8 **TYPE** into the form fields one by one:
Name: **Heavy Duty Pallet Wrap**
SKU: **PKG-PLT-01**
Category: **Packaging**
Price: **450**
Current Stock: **50**
Reorder Level: **15**
- 2.9 **CLICK** the **Save Product** button. The modal closes and the new product appears in the table.
- 2.10 **SAY** "An important business guarantee: inventory cannot be directly edited. Every stock change must go through an audited adjustment with a reason code."
- 2.11 **CLICK** the **Adjust Stock** button on any product row. A modal opens.
- 2.12 **CLICK** to select **Stock In** as the adjustment type.
- 2.13 **TYPE** Quantity: **25** and Reason: **Received supplier shipment**
- 2.14 **CLICK** **Save Adjustment**. The stock count in the table updates immediately (+25).
- 2.15 **CLICK** the **View Movement Logs** button on that product row.
- 2.16 **OBSERVE** Point at the audit log entries: timestamp, user who made the change, quantity delta (+25), and balance after.
- 2.17 **SAY** "Every stock movement is permanently recorded in the StockLog ledger with the authenticated user ID, the delta quantity, and the running balance. These logs are immutable."

4 Customer CRM & Follow-Up Tracking

03:00 - 04:00

- 4.1 NAV Click the Customers tab in the top navigation bar.
- 4.2 SAY "The Customers CRM module connects our sales pipeline to operations. Accounts are categorized as Wholesale, Distributor, or Retail."
- 4.3 OBSERVE Point at the customer type badges in the table: WHOLESALE , DISTRIBUTOR , RETAIL .
- 4.4 OBSERVE Point at the Next Follow-up column. Hover over any amber/red warning badge on overdue entries.
- 4.5 SAY "Follow-up dates with warning badges ensure sales reps never miss a reorder opportunity."
- 4.6 CLICK the + Add Customer button. A modal opens.
- 4.7 WAIT 1 second, then fill in the form:
- 4.8 TYPE into the form fields:
Name: Metro Superstores Ltd
Type: Wholesale (select from dropdown)
Status: Active
Contact Person: Rajesh Kumar
Phone: +91 98765 43210
- 4.9 CLICK Save Customer . The new customer appears in the table.
- 4.10 CLICK Schedule Follow-up on any customer row. Pick a date next week.
- 4.11 TYPE a follow-up note: Quarterly reorder cycle review . Then save.

5.15 SAY "When computing, our backend uses PostgreSQL row-level locks in an atomic Redis transaction, re-validates stock across ALL items

5 User Management & Administration (Admin Only)

04:00 - 05:00

- 5.1 NAV Click the Users tab in the navigation bar (this tab only appears for Admin role).
- 5.2 SAY "This is the User Management module, restricted exclusively to Administrators."
- 5.3 OBSERVE Point at the 4 KPI Metric Cards at the top: Total Users, Administrators, Sales Reps, Warehouse Crew. Move cursor across each card.
- 5.4 CLICK the + Add New User button. A modal opens.
- 5.5 TYPE into the form:
Name: Vikram Sharma
Email: vikram@operations.com
Role: Warehouse (select from dropdown)
Password: Warehouse@123
- 5.6 CLICK Create User . The new user appears in the table with an orange WAREHOUSE badge.
- 5.7 OBSERVE Point at the KPI cards - the counts have updated in real-time.
- 5.8 CLICK the Edit button on Vikram's row. Change role to Sales . Click Update User . The badge changes to green.
- 5.9 CLICK the Delete button on Vikram's row. A confirmation modal appears with a warning.
- 5.10 CLICK Delete User to confirm deletion. The user is removed from the table.
- 5.11 SAY "Administrators can onboard, update roles, or revoke access. Built-in safety: you cannot delete your own active account, and all passwords are bcrypt-hashed on the server."

10 Golden Rules for a High-Scoring Demo

- 1. **Deliberate cursor movements:** Don't jerk the mouse. Hover slowly and point precisely at what you're discussing.
 - 2. **Pause after modals open:** Wait 1 second so the viewer sees the form before you start typing.
 - 3. **Explain the WHY:** Don't just say "I'll click this". Explain *why* row locks matter and *why* prices are snapshotted.
 - 4. **Use the 1-click login buttons:** Shows developer ergonomics and saves time on camera.
 - 5. **Show cause and effect:** After confirming a challan, switch to Products to show stock went down.
- 6. **Highlight safety checks:** Point at low-stock badges, overdue follow-ups, and the delete confirmation modal.
 - 7. **Do one dry run:** Practice the full flow once without recording. Builds confidence and finds data gaps.
 - 8. **Speak clearly:** Moderate pace, confident tone, avoid filler words ("um", "like").
 - 9. **Record in 1080p 60fps:** Use OBS Studio (free) or Windows Snipping Tool (Win+Shift+R).
 - 10. **Mention the tech stack naturally:** Weave in React 19, TypeScript, Express, Prisma, PostgreSQL Neon.

6.7 NAV Click the Products tab. Show that Warehouse CAN use Adjust Stock.

Key Technical Terms to Mention During Recording

6.8 CLICK Sign Out again. Return to Login.

High-Impact Vocabulary

Row-Level Locking (SELECT FOR UPDATE)

Prisma Interactive Transactions

Immutable Price Snapshotting

Atomic Stock Deduction

Zero-Stock-Leakage Concurrency Guard

Permanent Audit Trail (StockLog)

Role-Based Access Control (RBAC)

JWT Bearer Authentication

Zod Schema Validation

Pure CSS Admin Design System

PostgreSQL on Neon Cloud

React 19 + TypeScript on Vite

6.11 SAT Sales can access CRM and create draft challans, but cannot adjust stock or manage users. This guarantees complete segregation of duties across the organization.

Emergency Troubleshooting (If Something Goes Wrong)

Quick Fixes

WHAT WENT WRONG	WHY IT HAPPENED	WHAT TO DO RIGHT NOW
Login fails / 401 error	Stale token in browser storage	Press F5 to refresh, then click the 1-click Admin button again.
"Adjust Stock" is grayed out	You're logged in as Sales or Accounts	Sign Out → login as Admin or Warehouse .
Challan confirm shows error	Not enough stock for the items	Pick a product with 50+ stock, or do a Stock In (+100) first.
"Users" tab missing from nav	Only Admin role can see it	Sign Out → login as Admin (admin@operations.com).
Page shows blank / error	Dev server may have crashed	Go to terminal → run <code>npm run dev</code> again in the project root.

You're ready! Follow the numbered steps on pages 2-3 in exact order. Each sub-step tells you precisely what to click, what to type, and what to say. Good luck with your recording!
